

e-bike for Smart City

A transportation solutions

The bike is made to last – the fully carbon design is super strong, making it a match any day of the week in enduring even the toughest of urban environmental challenges. Fitted with integrated front and rear mudguards, the bike incorporates a unique carbon belt drive, replacing the chain altogether. The weight is just 18.6 kg, making it one of the lightest commuter e-bike.

As peddling is always required therefore it falls under the cykel category and no number plate or licence is required
